FORWORD

The Institute for Chemical Research was set up in October, 1926, as a research institute attached to Kyoto Imperial University as this university was called then. The new institute amalgamated the already existing Special Chemical Laboratory of the Faculty of Science, and started with nine other laboratories. The late Prof. Masumi Chikashige was appointed director, and the institute's field of research covered a wide field, both theoretical and applied, of chemistry related with physics, engineering, medicine and agriculture.

Profs. Gen-itsu Kita, Shinkichi Horiba, Kinsuke Kondo and Ryuzaburo Nozu assumed the post of director successively, and now Prof. Senji Utzino is in office. The institute itself has continued to grow with the corresponding enlargement in its field of research, and at present it has twenty-six laboratories. Though with the close of the Pacific War activities of the institute were somewhat modified, it has continued to make many an achievement.

Most of the scientific achievements made by the members of the institute has appeared in the "Reports of the Institute for Chemical Research" as well as in the "Bulletin of the Institute for Chemical Research", which has replaced the former. The present number was, however, issued to commemorate the institute's twenty-fifth jubilee, which happens to fall on this year 1951. In view of the fact that in the commemoration number for the institute's tenth anniversary entitled "10 Jahre Institute für chemische Forschung" were printed the papers treating of the achievements made during 1926-1935, the present number is devoted to those done during the years 1936-1951.

The present number is dedicated to our lamented colleagues who had great contributions to the establishment and development of the institute; the late Drs. Yukichi Osaka (1866-1950), Masumi Chikashige (1870-1941), Kaoru Matsumiya (1884-1927), Denzo Uno (1892-1942), Hideki Hirata (1892-1950) and others. Let us pray for the repose of their souls. To the staff of the institute, who took part in the preparation and publication of the present volume as well as to Prof. Shinobu Iwamura (Research Institute of Humanistic Sciences, Kyoto University) who assumed the trouble of reading the English MSS. are due our sincere thanks.

Contents

Conspectus.....	1
Kondo Laboratory.	13
Nodzu Laboratory.	19
Sawai Laboratory.	28
Takei Laboratory.	36
Ogiu Laboratory.	45
R. Kimura Laboratory.	53
Mayeda Laboratory.	63
Utzino Laboratory.	66
Katagiri Laboratory.	69
K. Inouye Laboratory.	75
Sawamura Laboratory.	78
Sakurada Laboratory.....	84
Kodama Laboratory.	92
Oda Laboratory.	103
Sasaki Laboratory.	113
Ishibashi Laboratory.	118
Takagi Laboratory.	125
Horio Laboratory.	126
Tachi Laboratory.....	130
Y. Inouye Laboratory.	139
Yukawa Laboratory.	148
Abe Laboratory.	154
Horiba Laboratory.	163
Goto Laboratory.....	172
Arakatsu and Kimura Laboratories.	179
Uno, Hirata and Utzino Second Laboratories.	194
